

48 THE VIP VISITOR

Imagine that an important visitor is coming to your school.

Your class has been chosen to create a walking tour to show them the best things about your school.

The student with the best tour design will show the visitor around the school.

Create a scale drawing of your tour and a description of what you will show the VIP at each stopping point on the tour.

You could find a map of your school (online) and use the scale on that to estimate distances. Check that the distances are correct.
