

2 Game

What am I?

- a Each student draws five objects from the front, side and the top.
- b Take it in turns to show **ONE** view of one of your objects to your partner.
If they guess the object correctly they score 5 points.
- c If they do not guess correctly show them another view of the same object.
If they guess correctly they score 2 points.
- d If they did not guess correctly, show them the last view.
If they guess correctly they score 1 point.

The winner is the person with most points after all objects have been seen.
