

1 848

A, B and C each stand for a digit from 0 to 9.

If $ABC + CBA = 848$,
 find all of the pairs of numbers that **ABC** and **CBA** could be to make this true.

CHAPTER 2

1 848

A, B and C each stand for a digit from 0 to 9.

If $ABC + CBA = 848$,
 find all of the pairs of numbers that **ABC** and **CBA** could be to make this true.

CHAPTER 2

1 848

A, B and C each stand for a digit from 0 to 9.

If $ABC + CBA = 848$,
 find all of the pairs of numbers that **ABC** and **CBA** could be to make this true.

CHAPTER 2

1 848

A, B and C each stand for a digit from 0 to 9.

If $ABC + CBA = 848$,
 find all of the pairs of numbers that **ABC** and **CBA** could be to make this true.
