- a Which words in the box suggest that you would add?

Write a word problem for each and then a number sentence

I wrote this one for add.

I want to **add** together the \$45 I have saved and the \$20 I got for my birthday.

difference subtract between
 lost total increased by
 sum altogether add
 decreased by

- b Which words in the box suggest you would subtract?
 Write a word problem for each and then a number sentence.

The distance to school is 8 km.
 The distance to sports practice is 5 km.
 What is the **difference** between these two distances?
 $8 - 5 - 3 =$

I wrote this one for difference.

- c
- What are 35 and 68 together?
 - Add 35 and 68.
 - What is the total of 35 and 68?
 - Increase 35 by 68.
 - What is the sum of 35 and 68?

Write a number sentence for the first question in the screen.
 Will all of the other questions have the same number sentence?
 Write a word problem for the number sentence.

- d What is the difference between 93 and 39?
 Write a number sentence for this.
 Write as many different questions as you can that would give the same number sentence.
 Write a word problem for your number sentence.
