

5 TEACH IT WELL

An alien ship is approaching our galaxy and intends to visit Earth.

Your class has been asked to provide some maths lessons that will help prepare the aliens.

Your mission is to prepare the lesson on adding tidy numbers to be beamed on board the alien spaceship.

Your lesson should have:

- Two examples, one of them a word problem.
- Use of materials such as tens frames, place value materials, number lines etc.
- A short exercise of at least five questions.
- The answers to the exercise.

Give the lesson to someone else and have them rate it.
