

1 THE WILDLIFE PARK
– Practice at choosing a strategy

- a 17 children went to a wildlife park.
How much did this cost altogether?
- b How much would 12 adults cost?
- c At the park there were 18 bird cages.
Each cage had 6 birds.
How many birds were there altogether?
- d Two male kangaroos each weigh 62 kg.
Three females each weigh 32 kg.
How much do they weigh altogether?
- e One week 40 staff at the park each worked 30 hours.
How many hours is this altogether?
- f Another week each of the 40 staff worked 20 hours.
How many hours is this altogether?
- g The distance around each of nine animal enclosures is 200 m.
What length of fencing would be needed to go around all of them?
- h The distance around the lion enclosure is 900 m.
The male lion, Semba, paced around it 8 times.
How far did Semba pace in total?

Challenge

Create your own wildlife park and make up a set of eight questions for other students to answer.
Make sure you know the answers yourself first.
