

Looking at packaging

Packaging doesn't have to be boring.

- Do you think it is possible to make these packages from nets? Why do you think most packaging is in the shape of a cuboid?

Build a secret model

- multilink cubes or blocks
- a partner

- 1 Make a model using 4 to 8 multilink cubes so that your partner can't see it.
- 2 Describe your shape to your partner.
- 3 Your partner tries to build your model.
- 4 Compare your models.
- 5 Then your partner makes a model and you have to try to build it.
- 6 Discuss the words your partner used that helped you build it.
