

- Explain why you agree or disagree with Max.

Give examples to support your answer.

Statistics can be used in misleading ways. You often need to investigate the facts to get the full picture.

- Discuss why the claims in these newspaper headings are misleading.

But stats have just been released that show that the number of motorcyclists on the road has increased 72% in the last four years.

1

Florida News

Total motorcycle deaths in the state have increased 67 percent in the four years since the compulsory helmet law was revoked.

2

The Daily News

This graph shows clear evidence of significant global warming.
