

GETTING STARTED

CHAPTER 6 - INTRODUCING RATIOS

6

The instructions say to mix 3 parts water to 1 part juice.

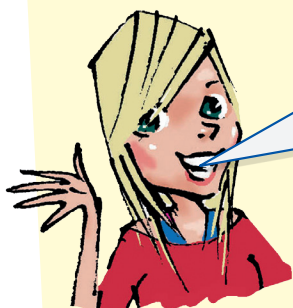

What does this mean?

If you had 1 litre of juice and you added the water, how many litres would you have altogether?

This lichen spray I have to mix up, says mix in the ratio of 1 part lichen spray to 10 parts water.

What does this mean?
What else do you mix in parts?

There are 3 dark haired people for every 2 fair haired people in my class.

What might Jess answer?

Are there only 5 people in your class?
