

LADDERS

- 1 Draw a ladder with five spaces, as shown.
- 2 Choose someone (it might be your teacher) to call out temperatures, including some below zero.
- 3 Write each temperature, as it is called, on to your ladder. Once a temperature is written on the ladder it cannot be removed.
- 4 If you cannot put a temperature in its correct order, you miss this turn.
- 5 The first person to get five temperatures in order is the winner.
