

Chapter 16 – Activity 1 - Question 2

Page 265

2

This isosceles triangle has
3 straight sides, 2 equal sides and 2 equal angles.
It has one line of symmetry and no rotational symmetry.

Ella decided to make a table to show the properties of some triangles.

Fill in this table.

	Number of equal sides	Number of equal angles	Number of lines of symmetry	Rotational symmetry
Isosceles triangle	2	2	1	No
Equilateral triangle				
Scalene triangle				
Right-angled triangle (not isosceles)				
Right-angled isosceles triangle				

Chapter 16 – Activity 1 - Question 2
