

Chapter 18 – Rich task 2 - Photo finish

Page 293

2

Photo finish

- an aerial or satellite photograph of your school from the internet
- tracing paper or light box

1 Trace the main buildings and landmarks from your photograph onto paper.

2 Colour the buildings one colour and the playing fields etc another.

3 Work out the scale of your map.

You may need to do this by measuring the actual distance between two buildings or landmarks, then measuring it on your tracing and working out the scale.

4 Work out where North is and put the North line on your drawing. Put a grid on your map and label the axes in some way. Make up some questions about your map to give to someone to answer.

You could make a "guided tour" of the school for visitors using your map.
