

Chapter 2 – Rich task 1 - What temperature?

Page 44

1

What temperature?

- Research temperatures in as many contexts as you can think of.
Examples - hottest/coldest temperatures ever recorded in NZ and the world
- coldest/hottest survivable temperatures by humans/animals
- temperature of humans, mammals, cold-blooded creatures
- temperature for destroying bacteria, viruses ... etc.
- As part of your research find differences between temperatures and order them.
- Choose an interesting way to present your findings.
