

Chapter 21 – Rich task 1 - Investigating other subjects

Page 344

1 Investigating other subjects

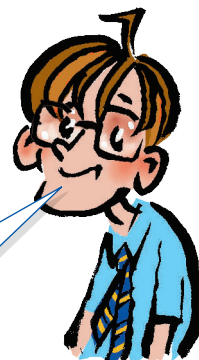

I wonder if there are more worms in my garden than the school garden.

I wonder what factors affect plant growth.

I wonder how the climate in two different countries affects their food production.

I think that the TV viewing habits of two different age groups will have some similarities and some differences.

- Choose something that you might study in another curriculum area that you can investigate statistically.
- Follow the Enquiry Cycle (see page 355) and write a short report about how you did each step.
