

Chapter 21 – Rich task 2 - Landscaping the school garden - j

Page 381

- j One class suggested that other shapes of paving stones such as hexagons, octagons, squares or triangles could be used.

Here is a plan of the garden.

Work out which of these two semi-regular tessellations would work best to tile the area shown.

Explain why you chose the shapes you did and why these shapes tessellate well together.
