

Chapter 22 – Check up on level 3 - Question 4

Page 361

- 4 Cory and Julia played a game.
They tossed a coin and a die together.

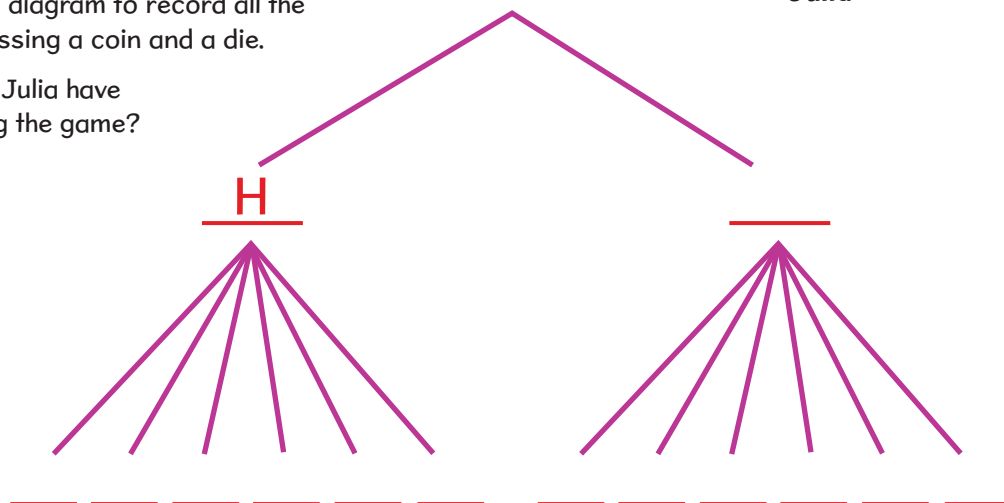

If it was a head and an even number Cory got a point.

If it was a tail and an odd number Julia got a point.

If anything else was tossed, they both got no points.

The overall winner was the person with the most points after 50 tosses.

- a Finish your copy of the tree diagram to record all the possible outcomes from tossing a coin and a die.
- b Do you think that Cory and Julia have the same chance of winning the game? Explain.
